

Duct Terminators

Interlocking system

Application.

Designed for easy labor saving installation, Maatco carries all types of Terminators to match your duct sizes. Designed for underground installation these ABS Terminators come in various sizes and or center points to match what your contract may require. We stock sizes from 2" up to 4.5" pipe sizes, but if your job requires custom sizes we will gladly assist you. All of our terminators are made to lock together. Most units come in a bank of 4, if you require more then 4, the banks are designed to lock together so that any amount of hols needed can be achieved. The inner plastic that keeps everything water tight can be knocked out easy with a hammer or chisel to clean out opening.

The Construction of our Terminators.

All of our terminators are made out of ABS plastics. ABS is a co polymer of Acrylonitrile, Butadiene, and Styrene. ABS plastics generally possess medium to high strength and performance at medium cost. ABS secures nicely with almost all other plastics to assure a solid connection. Each unit is formed to it's specification and tested for leaks and stack-ability (interlocking).

Important Information.

Most of our terminators are made for 5" and 6" walls. If you require a different wall thickness then please request a quote to match your needs.

So we can quote you efficiently we will need the following information.

- Pipe Size
- Center to Center Information
- How many in a row
- Complete pattern of holes needed

Custom Thermoforming.

Maatco wants to be your one stop source for all of your vacuum forming of plastics. We currently make knock outs for ladder installations as well as drain caps. If you are using Drills or foam then we probably have something that will help speed that process up. Please ask your sales Representative for details on how we can help you save labor costs as well as boost your quality along with flexibility.
